

## Evidence-Based Implant Dentistry: Improving Quality and Outcomes of Your Implant Practice

September 23-25, 2011  
Massachusetts General Hospital  
Boston, Massachusetts

Course Directors: Thomas B. Dodson, DMD, MPH & Sung-Kiang Chuang, DMD, MD, DMSc

In this didactic course, participants will learn how to apply the principles of evidence based clinical decision-making to the management of their implant practices. Topics to be included in this 3-day course:

- Management of implant patients and oral bisphosphonates
- Use of advanced CT imaging in the management of implant cases
- Management of dental implant complications
- Review of treatment planning concepts in dental implants
- Restoration considerations in implant dentistry
- Indications and outcomes associated with use of ultra-short dental implants
- Prognostic factors associated with implant survival
- Implant surgery in medically compromised patients
- Aesthetics in implant dentistry
- Role of site preservation and other dento-alveolar reconstructive techniques

**3-Day Course Tuition: \$1,995**

***pre-registration required***

*18 hours of continuing education credits will be awarded upon successful completion of this course (ADA CERP)*

Speakers to be announced. Speakers who have presented in the past include:
