

# Sun Safety: Protect Your Skin from Cancer

Skin cancer is the most common cancer in the United States. Being in the sun and any exposure to ultraviolet (UV) rays can increase your risk of skin cancer. At this educational table, come learn about skin cancer and how to safely protect your skin from the sun. There will be resources, activities, and giveaways!

Wednesday, April 23, 2025

10:00 AM – 2:00 PM

MGH Main Campus  
White 1 Hallway  
(Near Coffee Central)

This educational table is open to Mass General patients, families, staff, and the general public.
