

The Management of Inflammatory Bowel Disease in 2023

Date: Friday, May 19, 2023

Time: 12–1 pm (Eastern Time)

Crohn's disease and ulcerative colitis are immune-mediated diseases of the gastrointestinal (GI) tract, which are conditions caused by an overactive immune system. There are rising cases worldwide. To celebrate World Inflammatory Bowel Disease Day, Dr. Kristin Burke will review what is known about how these diseases develop. She will also provide updates on the expanded treatment options currently available for these diseases.

Featured Speaker: Kristin E. Burke, MD, MPH

Dr. Burke is an inflammatory bowel disease doctor at Mass General. She is the medical director of clinical operations for the Crohn's and Colitis Center and an instructor of medicine at Harvard Medical School. She specializes in the care of patients with Crohn's disease, ulcerative colitis, and microscopic colitis. Her research is focused on predicting response to therapies for inflammatory bowel diseases and the pathogenesis of microscopic colitis.

- This program is free and open to Mass General patients, families, staff, and the general public.
