

What is Fibromyalgia?

Date: Tuesday, May 14, 2024

Time: 12–1 pm (Eastern Time)

This presentation aims to demystify fibromyalgia, providing an overview of its symptoms and the challenges in diagnosis. We will explore how pain is perceived and processed in the brain in fibromyalgia and other chronic primary pain syndromes. We will also review the importance of a multidisciplinary approach to treatment, including lifestyle modifications, medications, sleep hygiene, and novel therapies shown to decrease pain.

Featured Speaker: Jonathan S. Hausmann, MD

Dr. Hausmann is a pediatric and adult rheumatologist at Massachusetts General Hospital and Boston Children's Hospital. He is also an Assistant Professor of Medicine at Harvard Medical School. He completed combined pediatric and adult rheumatology fellowships at Boston Children's Hospital and Beth Israel Deaconess Medical Center. Dr. Hausmann is interested in autoinflammatory diseases, health technology, and medical education.
