

# Lupus: An Evolving Landscape

**Date:** Wednesday, May 21, 2025

**Time:** 12–1 pm (Eastern Time)

Lupus is an autoimmune disease that can affect the skin, joints, kidneys, and many other organs and systems. Its wide range of signs and symptoms can make it difficult to diagnose. Treatment options continue to evolve, yet a gap for effective treatments with minimal side effects remains. Join Dr. Jacquelyn Nestor to learn more about lupus, new treatments, and promising therapeutics on the horizon.

## Featured Speaker: Jacquelyn Nestor, MD, PhD

Dr. Nestor is a Rheumatologist at Massachusetts General Hospital and Instructor at Harvard Medical School. As a member of the MGH Lupus Program, she is passionate about the care of patients with lupus and the crucial research required to better understand autoimmunity and improve patient care.

- This program is free and open to Mass General patients, families, staff, and the general public.
