

Is your child taking risperidone or aripiprazole?

Help us learn more about the long-term effects these medications may have on your child's weight.

The **Massachusetts General Hospital for Children** at the **Lurie Center** is currently recruiting for a new research study to learn about the long-term effects that **risperidone (Risperdal®)** and **aripiprazole (Abilify®)** have on weight in children and adolescents. It will also observe how the medications affect behavior and quality of life,

Participants must be:

- Between the ages of **3 and 17** year old
- Taking **risperidone** or **aripiprazole**
