

## Research Opportunity: Does your child *love* certain movies or TV shows?

Would you be interested in therapy for your child that targets social skills and emotional/behavior problems? If you are a parent of a child with ASD who is between 6 and 11 years old, he or she may be eligible to participate in a research study that is testing whether a **12-week therapy that uses your child's TV/movie interest will help to improve social skills and behavioral challenges**. All sessions will be held at the Lurie Center and compensation will be provided for time/travel.
