

Cynthia M. Cooper, MD

Dr. Cooper is an Assistant Professor of Medicine at HMS. She joined MGH's Inpatient Clinician Educator Service after training in Medicine at MGH, serving as Chief Resident and completing a Nephrology fellowship. Dr. Cooper is part of the core teaching faculty for the Department of Medicine and teaches HMS students in all years of training. She teaches renal physiology in the first-year Homeostasis II course. She also serves as Course Director for the Transition to the Principal Clinical Experience course at HMS, and Associate Course Director of MGH's Practice of Medicine course. Dr. Cooper has won several teaching awards for her educational leadership, including the Class of 2015 award for best educator at MGH.
