Dear Mass General Research Community,
As this summer draws to a close, the Mass General research community will bid goodbye to the hundreds of summer students who train our labs each year.

These programs often provide students with their first introduction to cutting edge research in academic labs and help us fulfill our academic mission to train the next generation of research leaders.

My lab has run an NIH-funded summer research program that has brought 70 students to train here over the past decade—and many of your labs are doing the same. I'd like to thank all of the researchers at Mass General who dedicate their time to mentor students each summer.

There are many formal and informal summer research programs across the hospital, including the Center for Diversity and Inclusion's Summer Research Trainee Program, the Morgan Institute's COVID-19, the Youth Neurology, Education and Research Program, the Eagan Institute Summer Experience (RISE) and the Digestive Disease Summer Research Program, just to name a few.

If you run a summer student research program, we'd love to know more about it! Email us at research@mgmgh.harvard.edu with the details.

Until next month,

Sue
Susan A. Slaugenhaupt, PhD

August 2021

Welcome to our Snapshot of Science for August 2021. Here's a quick look at some recent publications, press releases and stories about the Mass General Research Institute community.

In this issue we highlight:

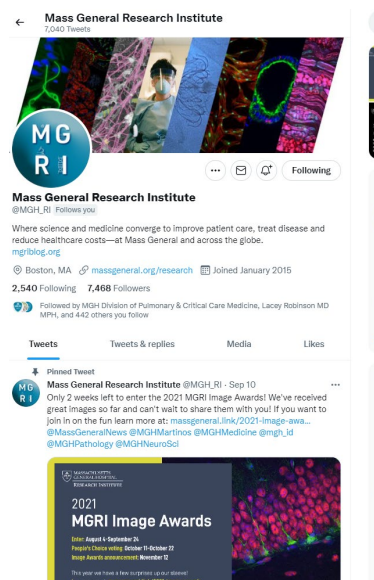

- 31 studies in high impact journals
- 15 press releases
- 6 new blog posts
- Publication summaries available on our website where indicated.

Publications

RACIAL AND ETHNIC DISPARITIES IN HEALTH CARE
Changes in Racial and Ethnic Disparities in Access to Care and Health Among U.S. Adults at Age 85 Years
