

Merit E. Cudkowicz MGH-Takeda Neuroscience Fellowship

This Fellowship provides a unique opportunity for a board-certified or board-eligible physician scientist trained in Neurology to spend 50% of their time within the two-year Fellowship working with the Takeda Neuroscience Therapeutic Area Unit in Cambridge, Mass., while performing clinical activities at Massachusetts General Hospital in Boston. **The recipient of this Fellowship will have an opportunity to work on one of a number of diverse projects that constitute a rich pipeline of new molecular entities for neurologic diseases.**

The Fellow will also receive formal training in translational medicine, clinical trial design and general pharmaceutical industry drug development and leadership training. Prior experience in drug development/translational research is not required.

The clinician-scientists are selected by a joint Takeda-Massachusetts General Hospital Search Committee and employed by the Massachusetts General Hospital. There is a 50% protected time commitment to the Takeda Neuroscience and a 50% commitment to clinical and/or research activities at Massachusetts General Hospital within the Department of Neurology. The program provides annual salary support plus benefits. Appointment begins on July 1, 2021.
