MASSACHUSETTS
GENERAL HOSPITAL

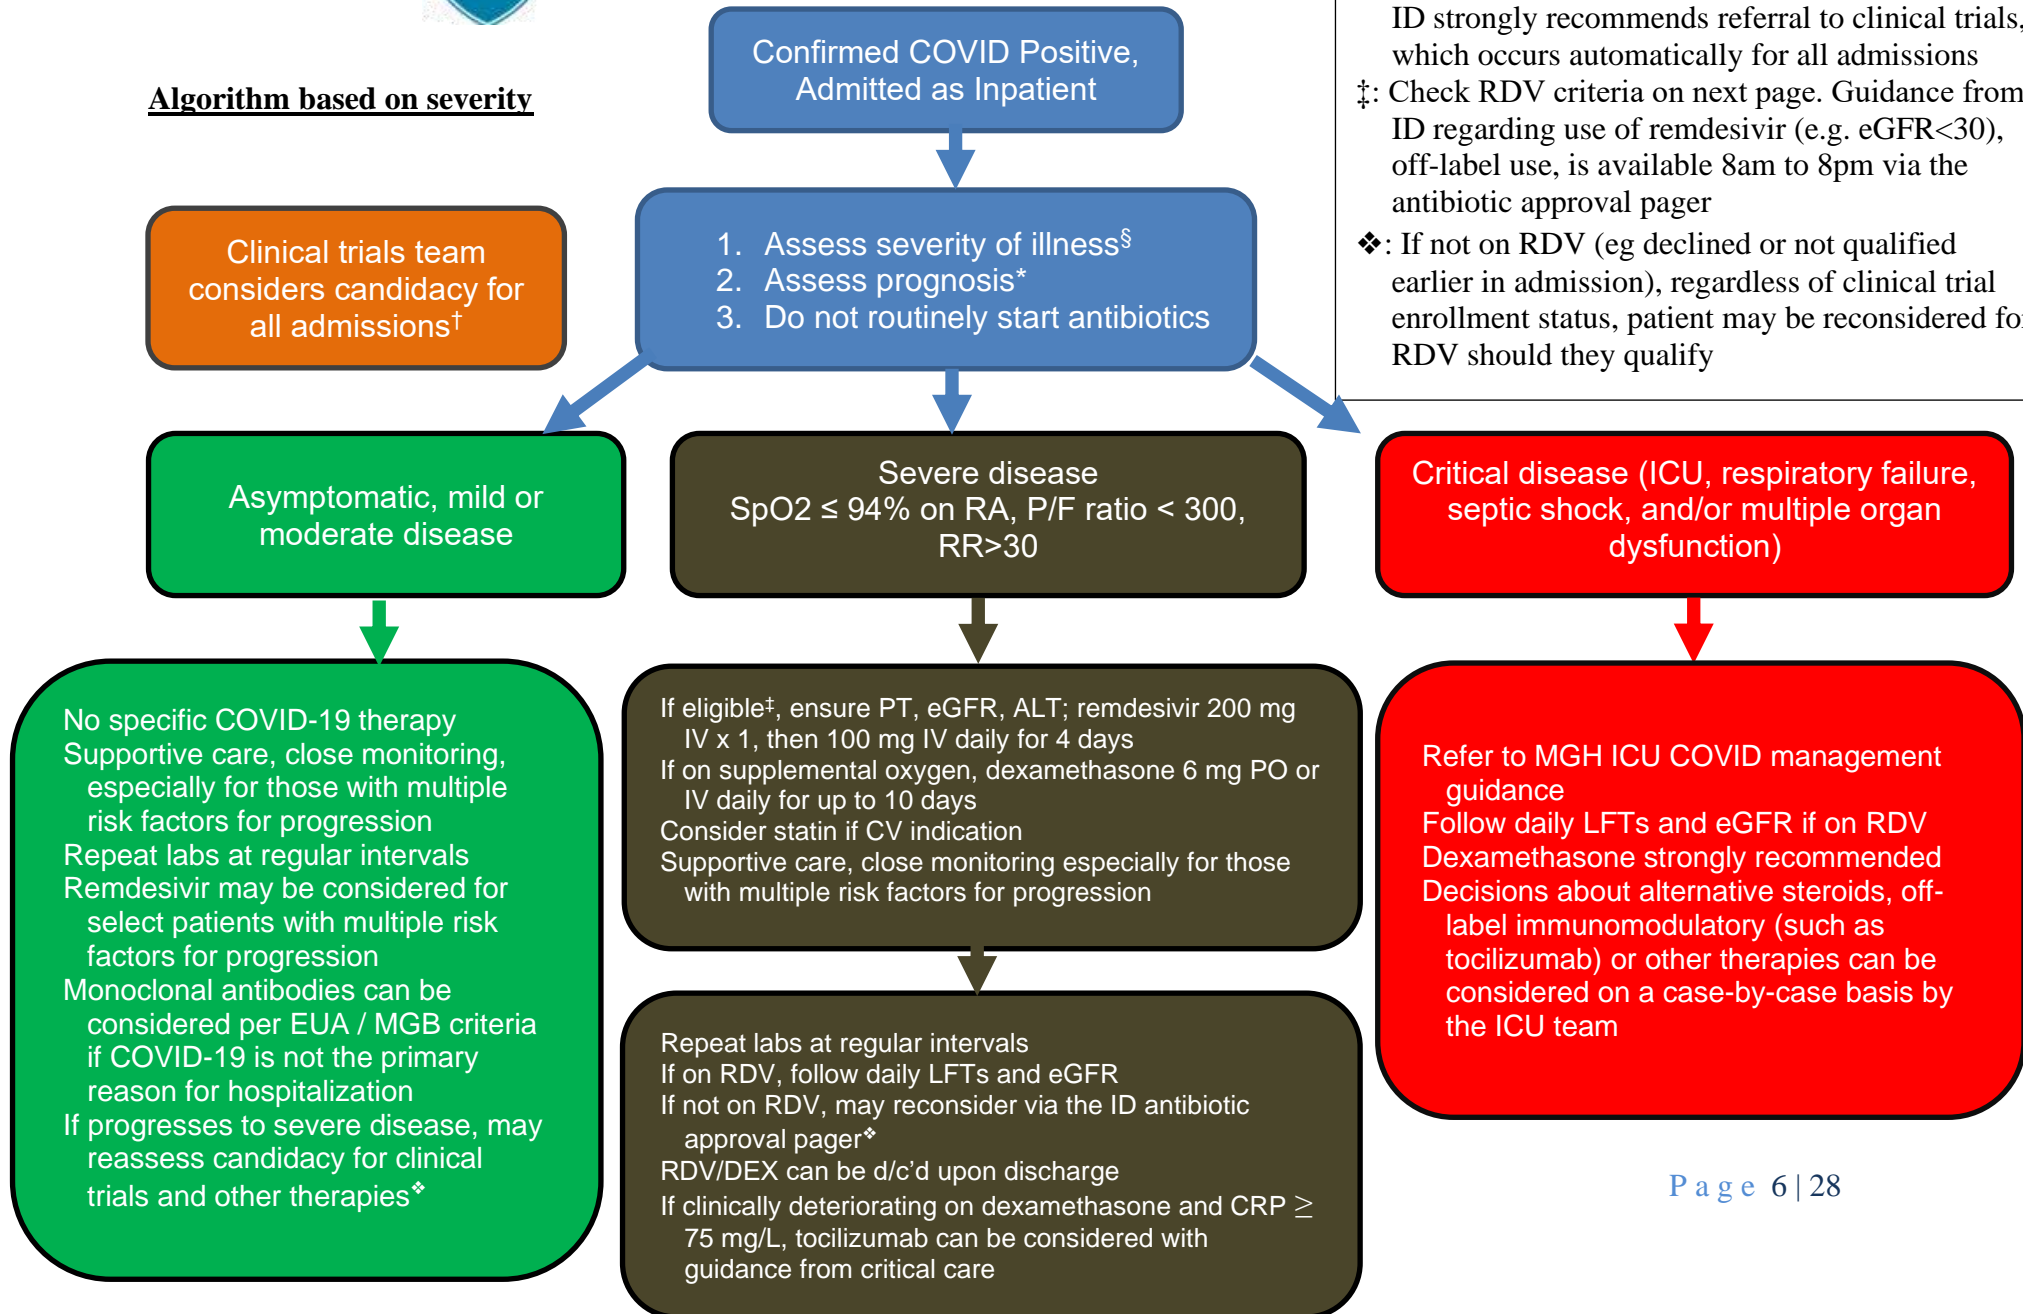

This document was prepared (in March-April, 2021) by and for MGH medical professionals (a.k.a. clinicians, care givers) and is being made available publicly for informational purposes only, in the context of a public health emergency related to COVID-19 (a.k.a. the coronavirus) and in connection with the state of emergency declared by the Governor of the Commonwealth of Massachusetts and the President of the United States. It is neither an attempt to substitute for the practice of medicine nor as a substitute for the provision of any medical professional services. Furthermore, the content is not meant to be complete, exhaustive, or a substitute for medical professional advice, diagnosis, or treatment. The information herein should be adapted to each specific patient based on the treating medical professional's independent professional judgment and consideration of the patient's needs, the resources available at the location from where the medical professional services are being provided (e.g., healthcare institution, ambulatory clinic, physician's office, etc.), and any other unique circumstances. This information should not be used to replace, substitute for, or overrule a qualified medical professional's judgment.

This website may contain third party materials and/or links to third party materials and third party websites for your information and convenience. Partners is not responsible for the availability, accuracy, or content of any of those third party materials or websites nor does it endorse them. Prior to accessing this information or these third party websites you may be asked to agree to additional terms and conditions provided by such third parties which govern access to and use of those websites or materials.

MASSACHUSETTS GENERAL HOSPITAL

Algorithm based on severity

§: When assessing severity, consider whether hypoxia is a new requirement or due to another cause (such as CHF)
*: See risk factors table on previous page
†: Current list of clinical trials is found at this [link](#). ID strongly recommends referral to clinical trials, which occurs automatically for all admissions
‡: Check RDV criteria on next page. Guidance from ID regarding use of remdesivir (e.g. eGFR<30), off-label use, is available 8am to 8pm via the antibiotic approval pager
❖: If not on RDV (eg declined or not qualified earlier in admission), regardless of clinical trial enrollment status, patient may be reconsidered for RDV should they qualify
