Musculoskeletal (MSK) Imaging Interprofessional Education Series: Muscle Injuries in Sports

This monthly educational offering serves to provide APPs and allied health professionals in the inpatient and ambulatory practice sites with comprehensive education designed to enhance understanding of MSK imaging techniques, accuracy/appropriateness of ordering, interpretation of findings, and how to integrate these findings into clinical practice to improve patient care and outcomes.

Featured Faculty:

Bill Palmer, MD
Director, Musculoskeletal Imaging & Intervention

At the end of this activity, the team will be able to:

- Understand radiographic imaging techniques to diagnose muscle injuries related to sports
- Develop skills to accurately order and interpret radiographic findings for muscle injuries
- Describe the most common muscle injuries in sports
- Recognize acute injuries and when to refer to sports specialists

The intended audience for this educational offering: NPs, RNs, MDs, PAs

Course Director: Anne M. Fiore, DNP, APRN

Program Manager: Karen M. Myrick, DNP, APRN, FNP, ONP, FAANP, FAAN

This course awards:

1 ANCC contact hours

1 AMA PRA Category 1 Credit

1 AAPA Category 1 CME credits

1.00 RN MD PA Credit Designation Statements
