(MS Teams link will be in confirmation email)

Musculoskeletal (MSK) Imaging Interprofessional Education Series: Radiographic Evaluation of Bone Lesions

This monthly educational offering serves to provide APPs and allied health professionals in the inpatient and ambulatory practice sites with comprehensive education designed to enhance understanding of MSK imaging techniques, accuracy/appropriateness of ordering, interpretation of findings, and how to integrate these findings into clinical practice to improve patient care and outcomes.

Featured Faculty:

Jad Hussein, MD

At the end of this activity, the team will be able to:

- Understand radiographic imaging techniques and application in evaluating bone lesions (benign, malignant).
- Recognize and differentiate between various types of bone lesions, including benign and malignant conditions, through radiographic images.
- Develop skills to accurately order and interpret radiographic findings, including identifying key features and patterns associated with different bone lesions.

The intended audience for this educational offering: NPs, RNs, MDs, PAs

Course Director: Anne M. Fiore, DNP, APRN

Program Manager: Karen M. Myrick, DNP, APRN, FAANP, FAAN

This course awards:

1 ANCC contact hours

1 AMA PRA Category 1 Credit TM

1 AAPA Category 1 CME credits

1.00 RN MD PA Credit Designation Statements
