“Update on Infection Prevention and Treatment”

Thursday, April 29, 2021
6:45 am - 7:45 am

Massachusetts General Hospital
Zoom
**William T. Obremskey, MD, MPH, MMHC** is Professor and Vice Chair of the Division of Orthopedic Trauma, Department of Orthopedics and Rehabilitation at Vanderbilt University Medical Center in Nashville, TN. He serves as the Chairman of the Orthopaedic Trauma Association Evidenced Based Medicine Committee.

Dr. Obremskey’s expertise is in musculoskeletal trauma outcomes, fiscal analysis, and study design. He has a clinical and research interest in knee dislocations, scapula fractures and necrotizing fasciitis.

He has served on the Steering committee of the Major Extremity Trauma Research Consortium (METRC) that has been awarded $70,000,000 to conduct nine prospective randomized trials for the Department of Defense. He is the principal investigator (PI) on two of these nine projects. He is currently the PI on a $4.5 million grant on early weight bearing of ankle and tibia plateau fractures.

Dr Obremskey has authored four chapters on Outcomes in orthopaedic trauma and three meta-analysis articles on orthopaedic trauma conditions as well as > 200 articles.

He has a strong record of mentorship of orthopaedic trauma fellows, orthopaedic residents, and medical students.
