Lung Transplant

At Mass General, we are dedicated to advancing transplant care through innovation and research. Our clinical trials provide patients access to novel treatments and therapies, aiming to improve outcomes and redefine standards in lung transplantation. By participating in these efforts, you'll contribute to groundbreaking discoveries that benefit both current and future patients.

Program highlights

Experience

Over 500 (and counting) lung transplants completed since 1990

Innovation

Leader in the largest-ever clinical trial for preventing organ rejection in lung transplantation

Cutting-edge technology

Pioneer in ex-vivo lung perfusion (EVLP) to assess and enhance donor lungs outside the body, increasing the number of viable lungs for transplantation and improving patient outcomes.

Comprehensive care

Multidisciplinary team of experts providing world-class treatment

Why choose us for your transplant care?

Our expert team is ready to provide world-class care for patients with advanced lung disease. Early referral can significantly improve outcomes. We are with you every step of the way

Take the first step towards renewed health with our world-class lung transplant team.
