

Cancer Center Series: Fertility and Cancer

Cancer treatment can affect your fertility, which is the ability to become pregnant or make someone pregnant. In this talk, Dr. Mary Morris will provide an overview of the reproductive system and how cancer therapies can impact future fertility. She will review current options to minimize the negative effects of chemotherapy and ways to potentially preserve your ability to have children.

This online program is free and open to Mass General patients, families, staff and the general public.
