

Multiple Sclerosis: Understanding the Condition and Working to Mitigate Its Impact

Date: Monday, August 21, 2023

Time: 12–1 pm (Eastern Time)

Join Dr. Giovanna Manzano to learn about multiple sclerosis. She will review how multiple sclerosis impacts the nervous system and its common clinical symptoms. Dr. Manzano will also give a general overview of treatment and management options, including lifestyle changes that can help mitigate disease activity.

Featured Speaker: Giovanna S. Manzano, MD

Dr. Manzano is a multiple sclerosis specialist, neuroimmunologist, and neurohospitalist who sees patients at Massachusetts General Hospital and Brigham and Women's Hospital. She is the Director of Quality Improvement of the MGH Neurology Department's Division of Neuroimmunologic and Neuroinfectious Diseases and is also teaching faculty for the Mass General Brigham neurology residents and Harvard Medical School students during their neurology clerkship at Brigham and Women's Hospital. Her clinical and research interests focus on clinical trial design and patient-reported outcome measures for patients with multiple sclerosis, MOG-AD, autoimmune encephalitis, neuro-rheumatologic conditions, and immunotherapy-mediated neurotoxicities.

- This program is free and open to Mass General patients, families, staff, and the general public.
