

Climate Change and Health Series: Populations at Higher Risk for Health Consequences of Climate Change

Date: Monday, December 12, 2022

Time: 12–1 pm (Eastern Time)

Climate change is an urgent public health problem that impacts individual, community, and population health. At-risk populations will be the focus of this presentation. Factors that contribute to health disparities and have greater impacts on people who are vulnerable to climate change impacts will also be discussed. These factors include poverty, racial discrimination, inadequate healthcare access, inadequate education, unhealthy living situations, unsafe working conditions, and more.

- This program is free and open to Mass General patients, families, staff, and the general public.
