

Staying Healthy: Sex Differences in Heart Disease

Date: Wednesday, February 1, 2023
Time: 12–1 pm (Eastern Time)

Although historically considered a “man’s disease,” heart disease is the leading cause of death in men and women alike. In this talk, Dr. Colleen Harrington will review the epidemiology of heart disease in women, differences in heart disease between women and men, unique sex-specific risk factors for heart disease in women, and special considerations for promoting female heart health.

Featured Speaker: Colleen M. Harrington, MD, FACC, FASE

Dr. Harrington is a cardiologist (heart doctor) and faculty member at Mass General. She is one of the associate program directors of the MGH Cardiology Fellowship and the Cardiology Clerkship Director for Harvard Medical School. She is the current Governor of the Massachusetts Chapter of the American College of Cardiology (ACC) and serves on several ACC national committees such as the Cardiovascular Disease in Women Committee and the Cardio-Obstetrics Workgroup. Her clinical and research interests include heart disease in women and valvular heart disease.
