

Disability Education Series

Cerebral Palsy: Diagnosis and Management

Date: Wednesday, March 27, 2024

Time: 12–1 pm (Eastern Time)

Cerebral palsy is one of the most common causes of disability in childhood with a range of causes. We will discuss the clinical features of cerebral palsy and review common etiologies. Additionally, we will review approaches to treatment of muscle tone and associated symptoms.

- This program is free and open to Mass General patients, families, staff, and the general public.
- To attend this program, click on this link: <https://partners.zoom.us/j/85859508845>
