

# Climate Change and Health Series: Exploring the Extent of Health Consequences Surrounding Climate Change

Climate change is a public health challenge that impacts our health, nutrition, and food sources. There are also significant impacts from rising sea levels, flooding, hurricanes, and wildfires. There is a growing understanding on the effects of climate change that are causing complex health challenges in the community. This presentation will offer an overview of the many challenges that we face in a climate-changing world.

**This online program is free and open to Mass General patients, families, staff, and the general public.**
