

Impact of COVID-19 on Breast Cancer Screening: Time to Continue Mammography Care

The COVID-19 pandemic has disrupted all our lives in unprecedented ways. It has also severely impacted breast cancer screening. Missed screenings and ignored symptoms may lead to delayed cancer diagnoses that carry worse outcomes and require more aggressive treatment. It is critical for us right now to continue breast cancer screening and mammography care because early detection saves lives. Join us to learn more!

This online program is free and open to Mass General patients, families, staff, and the general public.

Please submit questions you may have about the topic before the program to: PFLC@partners.org so that the speaker may address them during the session.

Featured Speaker:

Shinn-Huey Shirley Chou, MD, MPH

Dr. Shirley Chou is an Assistant Professor in the Department of Radiology at Mass General, where she serves as clinical service chief and director of medical education in the Breast Imaging Division. Her clinical and research efforts center around improving breast cancer outcomes by improving patient access to high-quality breast imaging care and improving the diagnostic performance of breast imaging technologies.

Date: Wednesday, October 12, 2022

Time: 12:00 PM - 1:00 PM
