

THE MAXWELL & ELEANOR BLUM PATIENT AND FAMILY LEARNING CENTER

Adult Congenital Heart Disease Tetralogy of Fallot: Anatomy and Long-Term Management

Join Dr. Doreen DeFaria Yeh for a talk on a common congenital heart condition called tetralogy of Fallot (TOF). In this presentation, she will review the specific medical issues that develop among children and adults born with TOF. She will also discuss how doctors monitor adult patients over their lifetime to ensure their hearts remain healthy and strong for years after surgical and catheter procedures. Patient stories will also be shared.

This online program is free and open to MGH staff, patients, and the general public.
