

# Alzheimer's Disease Diagnosis and Treatment

**Date:** Wednesday, September 11, 2024

**Time:** 12–1 pm (Eastern Time)

There have been many recent exciting developments in Alzheimer's disease diagnosis and treatment, but it can be hard to make sense of all of the changing information. In this presentation, we will provide an overview of Alzheimer's disease and discuss the current state of diagnosis and treatment, including anti-amyloid therapy.

## Featured Speaker: John Dickson, MD, PhD

Dr. Dickson is a neurologist and researcher at Massachusetts General Hospital specializing in Alzheimer's disease. He helped develop the Mass General Brigham Alzheimer Therapeutics Program that treats patients with anti-amyloid therapy, such as lecanemab. His research focuses on understanding disease processes involved in Alzheimer's disease and related disorders.

- This program is free and open to Mass General patients, families, staff, and the general public.
