

Laboratory Locations for Phlebotomy and Specimen Collection

There are many Mass General Brigham (MGB) laboratories (labs) throughout Massachusetts and southern New Hampshire for your child's phlebotomy (blood draw) and specimen (other bodily fluid or tissue) collection needs. This can include blood, stool sample or urine tests. If your child needs a lab test, their doctor will place an order through the hospital's computer system. When you and your child arrive to the laboratory of your choice, the staff there will be able to see the order on their computer. You do not need a referral to have a test at any of these laboratory locations.

Hours and locations may vary. Please call your lab of choice ahead of time to confirm that the lab is open and that they can complete your child's test.
