Stay in Shape Summary Report
2018-2019 School Year

Program Overview

Spearheaded by the MGH Community Health Associates / A Division of the MGH Center for Community Health Improvement, the Stay in Shape (SIS) Program strives to empower student participants to live a healthy life through not only learning the most current knowledge and skills in nutrition, physical activity and stress management but also making positive changes in these areas in everyday life. This past school year (2018-2019), in which a total of 115 students attended the program, marks the 19th year of Stay in Shape operation in the three MGH Health Center served communities of Charlestown, Chelsea, and Revere. Of the 115 students:

Program in Numbers by Community

Charlestown – Total participated students: 47
- 32 students participated in the combined intervention of Stay in Shape, Life Skills, E-cigarette/Vaping, and Bullying Prevention at Warrant-Prescott School in the fall semester of 2018. 15 students at Harvard-Kent Elementary School completed the same combined intervention in the spring semester of 2019.

Chelsea - Total participated students: 13
- 13 students at Eugene Wright Science and Technology Academy completed the Stay in Shape Program also in the spring semester of 2019.

Revere - Total participated students: 55
- Five students completed the program at Revere High School in the spring semester of 2019. Two outstanding participants received further training to become Stay in Shape Mentors.
- 50 youths participated in the 6-week Stay in Shape Mentor Program offered through the program’s long-standing collaboration with the MGH Revere Youth Zone that hosted the 2019 Summer Camp Program. The two Stay in

Stay in Shape collaborated with the following programs in delivering a more comprehensive intervention to students in Charlestown in school year 2018-2019:

• Charlestown Coalition for the Life Skills Curriculum.

• CirclePoint Program for the Bullying Prevention.

• MGH Community Health Associates’ Living Tobacco Free Program for the E-cigarette/Vaping education.
Shape Mentors from Revere High School spearheaded the Mentor Program.

**Intervention Areas and Outcomes**

Stay in Shape delivers a comprehensive curriculum with seven core learning objectives, all of them recommended by national health experts for creating valuable lifestyle education experiences for youth:

1. Eat enough fruits and vegetables – Go for a total of 5-9 servings a day
2. Start the day with a healthy breakfast
3. Learn to read the Food Labels
4. Set a healthy limit to entertainment screen time
5. Control daily stress through practicing evidence-based relaxation techniques
6. Be physically active for at least 60 minutes a day
7. Sleep well for 9 – 10 hours every night

As in previous years, the participants in this past school year demonstrated improved knowledge, skills, and behavior changes in most of the intervention areas during the program, according to the program’s pre- and post-survey results\(^1\).

To date, Stay in Shape has reached a total of 3,016 students since the program first started at Chelsea High School in 2000 (Please see Appendix A - Program at a Glance by School / Site at the end of this report for more detailed information).

**Acknowledgement**

Stay in Shape would not have been possible without a village of visionary and committed colleagues from the MGH Health Centers, School-Based Health Centers, MGH Revere Youth Zone, leaders and teachers from each of the participating schools, student interns and volunteers. In this past school year, the program was deeply indebted to the following student volunteer:

Madeline Friedman, BS

Madeline is a graduate with her Bachelor of Science Degree in Nutrition from UMass Amherst. She works at MGH Division of Gastroenterology full time while volunteering for Stay in Shape. Her major contributions to the program include creation of a student handout on Hidden Sugar for the program’s curriculum and program evaluation for the combined Life Skills – Stay in Shape Program implemented in schools in Charlestown.

\(^1\) The pre- and post-intervention surveys were collected from the two program participating schools in Charlestown only in school year 2018-2019.
