

CAR Study Timeline

Duration of study is less than 1 week

Week 1

- An online survey will be emailed to each person in the study 24 hours after signing up.
- A package will arrive containing kits to collect a blood sample 1-4 days after signing up.

Please wait to complete the survey until you receive the package.

- Each person from your household that is taking part in the study will collect the blood sample.
- After completing the survey and collecting the blood sample, mail the sample to MGH within one day.
