Musculoskeletal (MSK) Imaging Interprofessional Education Series: Radiographic Evaluation of Low Back Pain

This monthly educational offering serves to provide APPs and allied health professionals in the inpatient and ambulatory practice sites with comprehensive education designed to enhance understanding of MSK imaging techniques, accuracy/appropriateness of ordering, interpretation of findings, and how to integrate these findings into clinical practice to improve patient care and outcomes.

Featured Faculty:

Jad Hussein, MD

At the end of this activity, the team will be able to:

- Understand radiographic imaging techniques and application in evaluating low back pain.
- Develop skills to accurately order and interpret radiologic findings.
- Identify the appropriate use of MSK imaging; plain x-ray, MR, CT, PET, US.
- Recognize and interpret common benign musculoskeletal pathologies of the lumbar spine/low back.
- Increase knowledge relative to the wide variety of MSK procedures to treat various conditions of the low back (e.g. steroid injections).

The intended audience for this educational offering: NNPs, RNs, MDs, PAs

Course Director: Anne M. Fiore, DNP, APRN

Program Manager: Karen M. Myrick, DNP, APRN, FAANP, FAAN

This course awards:

1 ANCC contact hours, 1 AMA PRA Category 1 Credit™

1 AAPA Category 1 CME credits

RN MD PA IPCE Credit Designation Statements
