

Celiac Disease Genomic, Environmental, Microbiome and Metabolomic Study

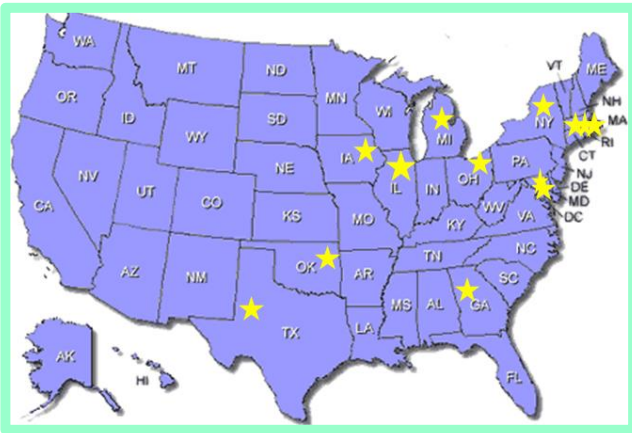

55 Fruit Street (Jackson 14) • Attn: CDGEMM Study • Boston, MA 02114

The CDGEMM study enrolls infants who have a first degree-relative (mother, father, sibling) diagnosed with celiac disease. Our very first GEMM decided to participate in the study all the way back in March of 2014! As you could have guessed, a lot has happened since then.

CDGEMM Across the Globe

We're currently uncovering GEMMs all across the United States. Though half of our GEMMs reside in the state of Massachusetts, the rest can be found in the regions depicted below.

Disponibile Anche In Italiano! Our first international GEMM has officially completed the enrollment process in Salerno, Italy. We're looking forward to the recruitment process overseas and to welcoming many more GEMMs in the near future.

CDGEMM by the Numbers

Since the US kick-off of CDGEMM, we have:

- ☑ Enrolled **26 children**
- ☑ Collected **44 stool (poop) samples**
- ☑ Documented **178 months** of food diaries
- ☑ Celebrated **5 first birthdays!**

What GEMMs (and their Parents and Doctors) are Saying

Do you have a comment about your participation in CDGEMM? We're looking for participants, and their parents and practitioners, to offer their real advice about what it's like to be a GEMM.

Direct your insights, comments, praise or criticisms to CDGEMM@mgh.harvard.edu (or snail mail us anonymously) for a chance to be featured here.

Keep up with CDGEMM

Don't forget that we are still recruiting GEMMs! Be sure to visit www.CDGEMM.org for more information about the study. You can also keep up with us through updates from the Center for Celiac Research website at www.celiaccenter.org.

On Twitter? Follow our study doctor, Maureen Leonard, MD (@CeliacDoc) or the Center (@Celiac Research) or #CDGEMM to see who's talking.

On Facebook? Visit the Center for Celiac Research page to network with other GEMMs.
