

LURIE CENTER FOR AUTISM

MASSACHUSETTS
GENERAL HOSPITAL

MassGeneral Hospital
for Children™

Is your child between the ages of 18 months – 4 years old?

The **Massachusetts General Hospital for Children** at the **Lurie Center** is conducting a Research Study to find out if a specific blood test is effective in the early detection of autism spectrum disorders. The Lurie Center is recruiting children who are in the process of getting evaluated for an **autism spectrum disorder** or **developmental disorder**, as well as **typically developing** children. All participants must be between the ages of **18 months to 48 months**.

For more information about this opportunity,
please contact Dr. Neumeyer's research team at:
