

Do you know an adult with Angelman Syndrome?

The Massachusetts General Hospital *for* Children at the **Lurie Center** is currently recruiting for a new research study that will evaluate the effectiveness of the study drug, OV101, as a treatment for improving symptoms present in Angelman syndrome, such as motor dysfunction.

Participants must be:

- **between the ages of 18 and 49 years old**
- **diagnosed with Angelman syndrome**

For more information, please contact Dr. Keary's research staff at:
