Dermatology Grand Rounds:
“New Developments in Energy-Based Device Treatments in Dermatology”

Dieter Manstein, MD, PhD
Assistant Professor of Dermatology
Harvard Medical School
Cutaneous Biology Research Center
Massachusetts General Hospital

Audience: Dermatologists, Pathologists, Residents, Medical Students

Learning Objectives:

1) Identify the basic concepts of laser-tissue interaction.
2) Outline the different clinical effects of skin cooling in relation to energy-based devices.
3) Assess the risks and benefits of applying specific energy-based devices and cooling technologies as skin therapy.
4) Summarize new and emerging technologies and indications for energy-based devices in dermatology.

Date: October 2, 2018
Time: Lecture: 8:00am – 9:00am
Where: Simches Research Center
185 Cambridge Street, 3rd Floor, Room 3110
Boston, MA 02114

Course Director, Stephen Ostrowski, MD, PhD Massachusetts General Hospital, Dermatology
