Getting an MRI with Headphones and Goggles

First  you  lie  down.

Then  the  nurse  puts  goggles  over  your  eyes.
Then  the  nurse  puts  headphone  on  your  ears.
Then  the  table  moves  into  the  big  camera.
Then  relax  and  stay  still.
Then  the  table  moves  out.
Then  the  nurse  takes  off  the  goggles  and  headphones.
Then  finished!

Great  job!
