This document was prepared (in March/April, 2020) by and for MGH medical professionals (a.k.a. clinicians, care givers) and is being made available publicly for informational purposes only, in the context of a public health emergency related to COVID-19 (a.k.a. the coronavirus) and in connection with the state of emergency declared by the Governor of the Commonwealth of Massachusetts and the President of the United States. It is neither an attempt to substitute for the practice of medicine nor as a substitute for the provision of any medical professional services. Furthermore, the content is not meant to be complete, exhaustive, or a substitute for medical professional advice, diagnosis, or treatment. The information herein should be adapted to each specific patient based on the treating medical professional’s independent professional judgment and consideration of the patient’s needs, the resources available at the location from where the medical professional services are being provided (e.g., healthcare institution, ambulatory clinic, physician’s office, etc.), and any other unique circumstances. This information should not be used to replace, substitute for, or overrule a qualified medical professional’s judgment.

PARTNERS INFECTION CONTROL GUIDANCE FOR
PATIENTS WITH CONFIRMED COVID-19: CRITERIA FOR RESOLUTION OF
COVID-19 INFECTION STATUS AND DISCONTINUATION OF ISOLATION

This guidance is for patients with confirmed COVID-19 who remain hospitalized or are being considered for discharge to rehab and indicates when COVID-19 Infection Status be resolved, and isolation discontinued. These recommendations are based on interim CDC guidance (https://www.cdc.gov/coronavirus/2019-ncov/hcp/disposition-hospitalized-patients.html).

Resolution of COVID-19 Infection Status may be considered when the following conditions are met:

1. At least 3 days (72 hours) have passed since resolution of fever (without the use of antipyretic medications) and improvement in respiratory symptoms (e.g., cough, shortness of breath) and
2. At least 7 days have passed since symptoms first appeared, and
3. Two nasopharyngeal swabs taken ≥24 hours apart are negative.
   a. When testing for clearance of infection, await the results of the first test before sending the second test.
   b. If the first or second nasopharyngeal swab is positive, maintain precautions and repeat a nasopharyngeal swab after 72 hours or later. Clearance requires two consecutive tests ≥24 hours negative. Repeat at 72 hour intervals if nasopharyngeal tests continue to be positive.

Resolution of COVID-19 Infection Status and Isolation orders requires approval from local Biothreats/Infection Control Leadership.
