Brian E. Grottkau, MD
Chief, Pediatric Orthopaedic Service
Department of Orthopaedic Surgery
Massachusetts General Hospital
Assistant Professor of Orthopaedic Surgery
Harvard Medical School
Boston, MA

“The Future Ain't What it Used to be:
Orthopaedics and Regenerative Medicine”

Thursday, November 15, 2018
6:45 am - 7:45 am

Massachusetts General Hospital
O’Keeffe Auditorium
Brian E. Grottkau, MD grew up in northern California and is a proud graduate of Jesuit High School in Sacramento. He attended Harvard College where he graduated with a degree in biochemistry and molecular biology. He went on to attend Harvard Medical School and completed the Harvard Combined Orthopaedic Residency Program. After completing 6-months as Chief of the East orthopaedic trauma service, he pursued fellowships in adult spine surgery and in pediatric orthopaedics.

From 1997-2002 Dr. Grottkau served as the Chief of Pediatric Orthopaedics and Adult Spine Surgery at the Tufts-New England Medical Center and Floating Hospital for Children. He returned to the Massachusetts General Hospital in 2002 to become Chief of Pediatric Orthopaedics and served as interim Chief of Adult Spine Surgery from 2002-2003. He is also Chief of Orthopaedics at the Shriner’s Hospital for Children, Boston.

Dr. Grottkau established the Peabody Fellowship in pediatric orthopedics in 2005 and founded the Laboratory for 3D Bioprinting that same year. His primary clinical interest is complex spinal deformities in children. He has co-authored 55 peer reviewed publications, 28 chapters and other publications and is co-inventor on multiple national and international patents. He is an assistant professor of orthopaedics at Harvard Medical School.
